## Statement of SDRPY General Supervisor

The leadership of the Kingdom of Saudi Arabia, since the reign of the founder King Abdulaziz, and until the reign of the Custodian of the Two Holy Mosques, King Salman bin Abdulaziz Al Saud and His Royal Highness the Crown Prince, Prince Muhammad bin Salman bin Abdulaziz Al Saud, is keen on the Kingdom to play a major role in relief, humanitarian work, development and reconstruction for several countries around the world, which is why the Kingdom of Saudi Arabia has become one of the largest donors of aid and supporters from which Arab, Islamic and other countries around the world have benefited.

The Kingdom of Saudi Arabia sets a shining example regarding the employment of the concepts of development and reconstruction during internal conflicts in countries whenever possible and safe, convinced as it is that peoples in afflicted and affected areas have the right to be supported by projects and programs that help them to remain steadfast and enhance their main rights in health, education and other sectors.

The Kingdom of Saudi Arabia established SDRPY in 2018, as a continuation of its development role in the Republic of Yemen. SDRPY aims to continue building the capacities of the Yemeni government and local authorities and raising their efficiency to lead development and contribute to strengthening the role of the Yemeni government in achieving.

economic recovery, and SDRPY works in accordance with the highest international development standards in harmony with the seventeen Sustainable Development Goals (SDGs) set by the United Nations.

In its projects and initiatives, SDRPY is, moreover, keen on strengthening international partnerships in order to achieve effectiveness and integration in development and reconstruction efforts in Yemen, and supports the Yemeni government to implement development projects and restore basic services that have a direct impact on multiple sectors, the most important of which are education, health, environment, sustainable food security, job creation and enhancing livelihoods and living, empowerment of women, transportation, agriculture, fisheries and other sectors.

This report provides an overview of SDRPY work methodology, projects and programs as well as the various sectors on which Saudi development experts work with a vision and ambition for Yemen to rise to the aspirations of the Yemeni citizen, rebuild its infrastructure and services and meet its development needs.

**SDRPY General Supervisor**  
**Mohammed bin Saeed Al Jabir**

## Overview of SDRPY

SDRPY is considered an essential pillar in achieving the Kingdom of Saudi Arabia's strategy in Yemen, and the Kingdom's commitment to supporting Yemen's development. The royal decree was issued in 2018 to commence activities in order to provide the necessary development needs to restore stability and enhance security in the Yemeni governorates, provide basic services and create direct and indirect job opportunities, through the implementation of small and large projects and development initiatives for several sectors.

Today, SDRPY ranks highest and occupies an influential position in the field of development and reconstruction in Yemen, achieving tangible successes. SDRPY is the only global body whose projects and initiatives have not stopped since its inception in 2018, with offices inside Yemen despite the various risks and challenges, in continuation of the Kingdom of Saudi Arabia's contributions to supporting the Yemen people.

Chapter One

# A Vision-Guided Development

# 01 | The Kingdom Vision 2030

SDRPY objectives are consistent with the Kingdom of Saudi Arabia's Vision 2030, aimed at bringing about comprehensive development in the economic, social, environmental, political and other fields, within a series of support contributions that achieve comprehensiveness and effective integration in the process of promoting stability and peace efforts.

The Kingdom of Saudi Arabia is the Arab and Islamic pivot, as it plays a leading role as a core, pivotal and central country that support the Arab and Islamic countries. It has strengthened its development role through the Saudi Development and Reconstruction Program for Yemen (SDRPY), which provides institutional, technical and logistical support in order to build the capabilities and institutions of Yemen, including the government, to complement the efforts of the Kingdom of Saudi Arabia in making the transition from relief phase to development phase efficiently and effectively.

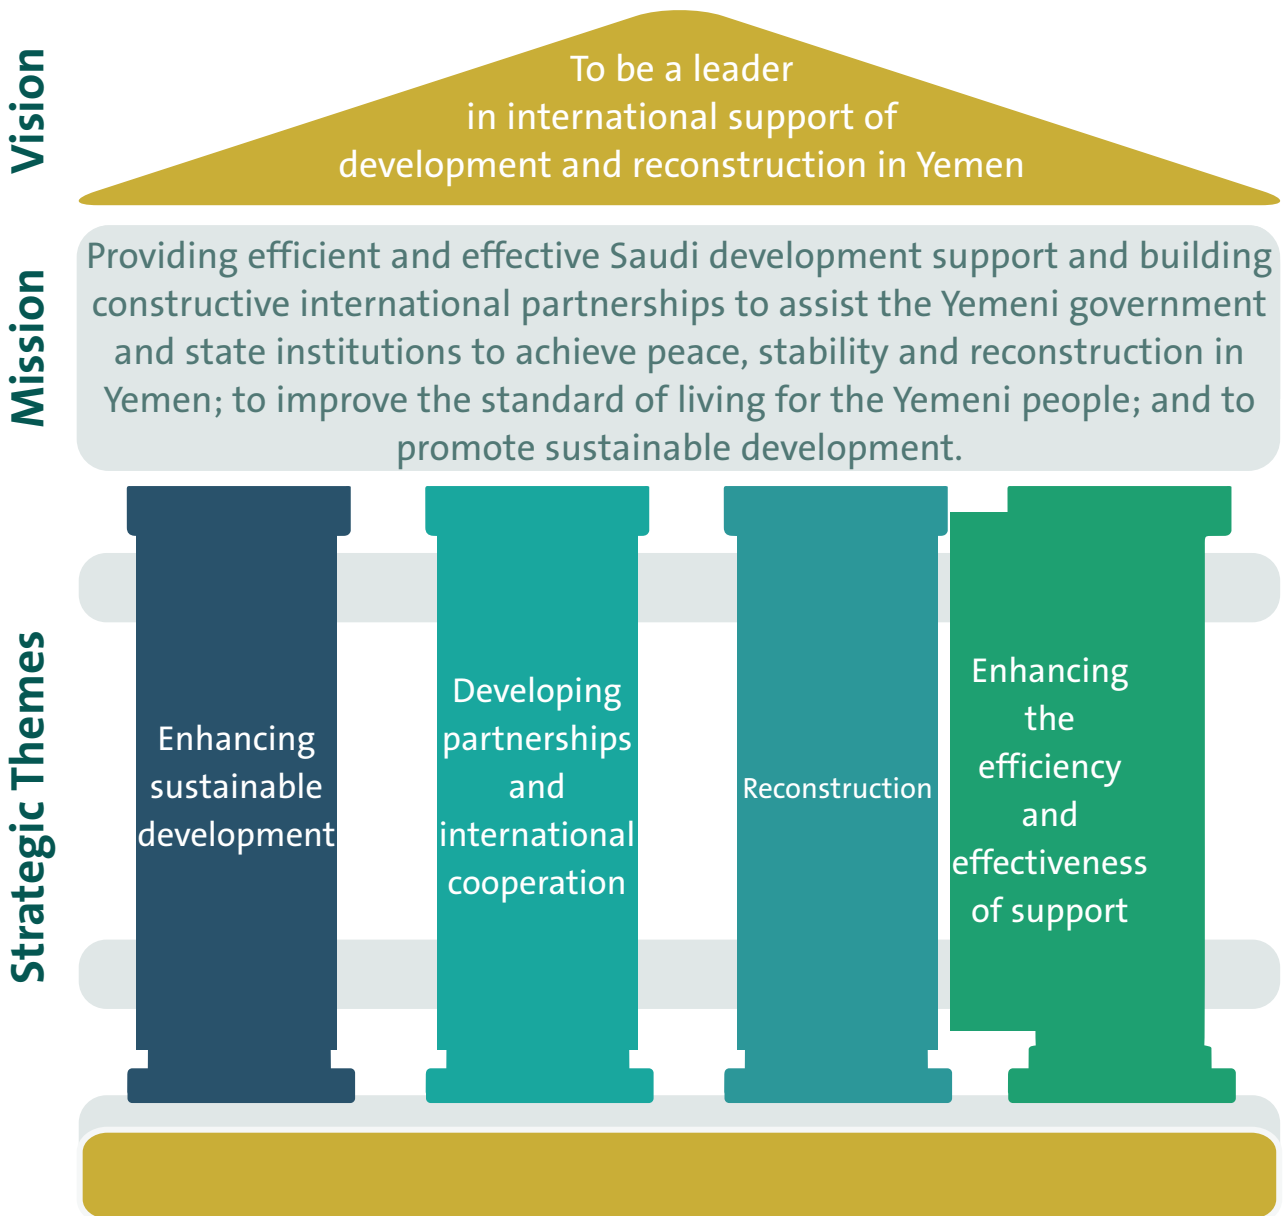

SDRPY combines its efforts with development partners in Yemen, and coordinates its work with the Yemeni government and local authorities. Furthermore, SDRPY works to engage civil society in its development projects and initiatives, in an effort to create comprehensive and sustainable development, and to achieve the best results that are in the interest of the stability and security of the Republic of Yemen, which has an impact on the stability in the Kingdom and the region.

SDRPY adopts the best practices and standards to ensure high-quality and effective implementation of projects with partners from the private sector, under the supervision of SDRPY offices across the Yemeni governorates, which made it possible to know the impact and repercussions of development projects, programs and initiatives, as well as communication activities on the ground.

Since its inception, SDRPY has implemented 224 development projects and initiatives in various sectors by relying on the capacities of Saudi young men and women; in order to strengthen the contribution to improving the livelihood and standard of living in Yemen, which would enhance tolerance and peace. This will positively affect the prosperity and recovery of the economic movement and productivity and raise its efficiency, by strengthening partnership with international organizations and the private sector through modern and stimulating development practices based on the “Pillars of Vision: The Heart of the Arab and Islamic Worlds”, and strengthening the position and standing of the Kingdom of Saudi Arabia in the region and the world.

## 02 | SDRPY Strategic Framework

**“We aim for the children of Yemen to arm themselves with books, not guns.”**

A newborn baby is sleeping peacefully in a hospital bed. The baby is wearing a patterned headscarf and is partially covered by a white blanket. In the foreground, a blue metal bed frame is visible, with a white scale labeled 'YRBB-20' resting on it. To the left, there are several yellow and red plastic containers. The background shows a window with a metal grille, letting in bright light. The overall scene is a clinical setting, likely a hospital or clinic.

# 01 | Peace and Stability are the Basis for Sustainable Development in Yemen

Development and reconstruction are necessary pillars for establishing lasting peace, overcoming the effects of wars and conflicts, and supporting communities and people. Therefore, the development and reconstruction of Yemen will create a future of peace and prosperity.

The Kingdom of Saudi Arabia and its leadership seek to provide for the needs of Yemenis by implementing projects, initiatives and development programs in various vital sectors.

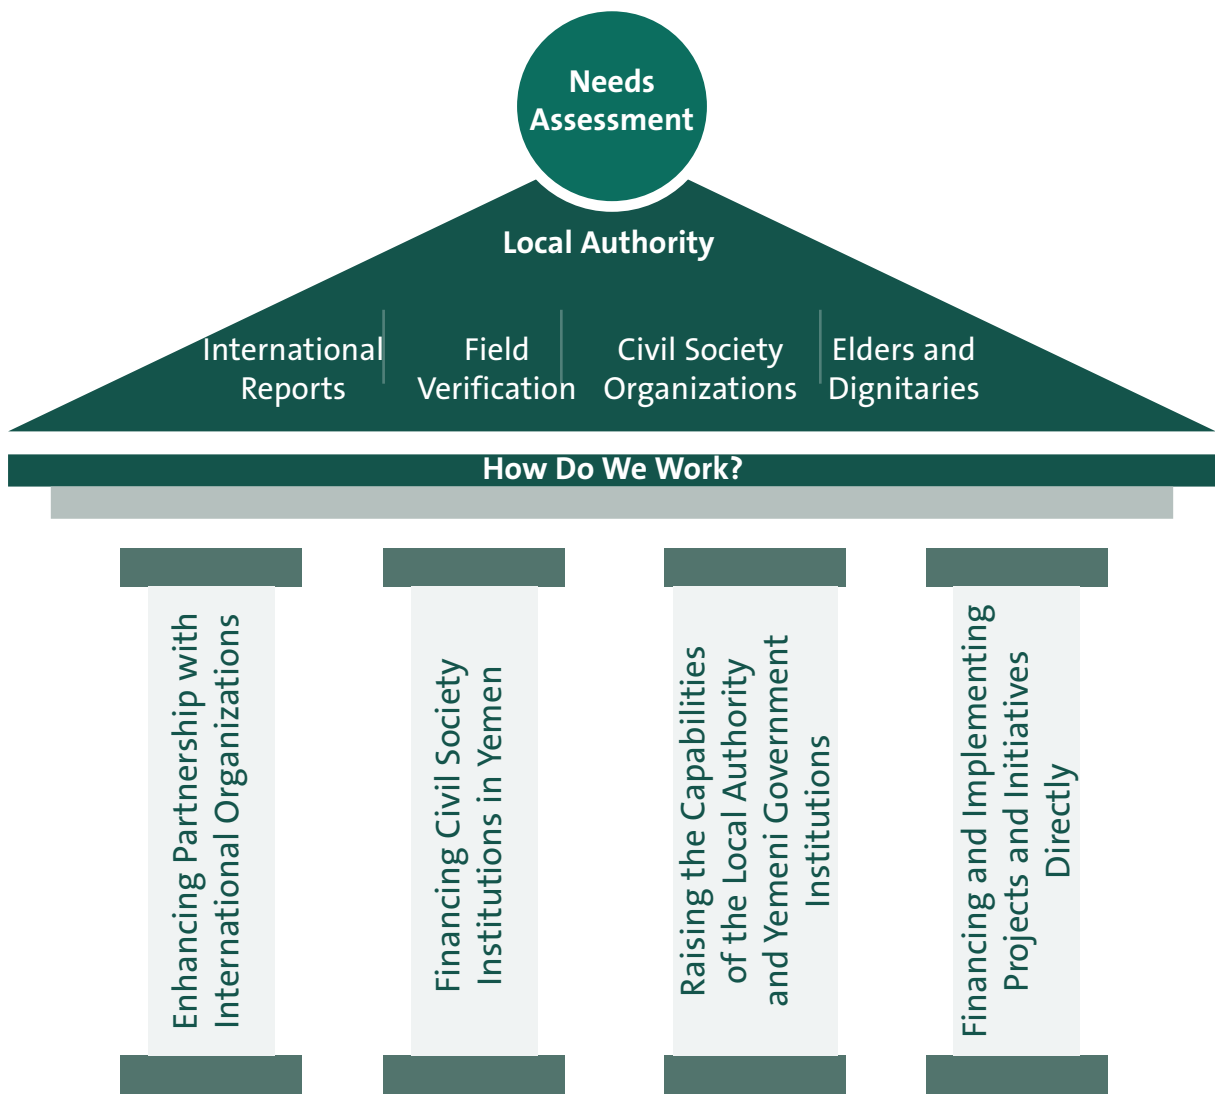

## 02 | Governance and Operation

SDRPY supports vital sectors, such as health, education, energy, transportation, water, agriculture and fisheries and development programs. Furthermore, SDRPY rebuilds the infrastructure and builds capacities of Yemeni government institutions

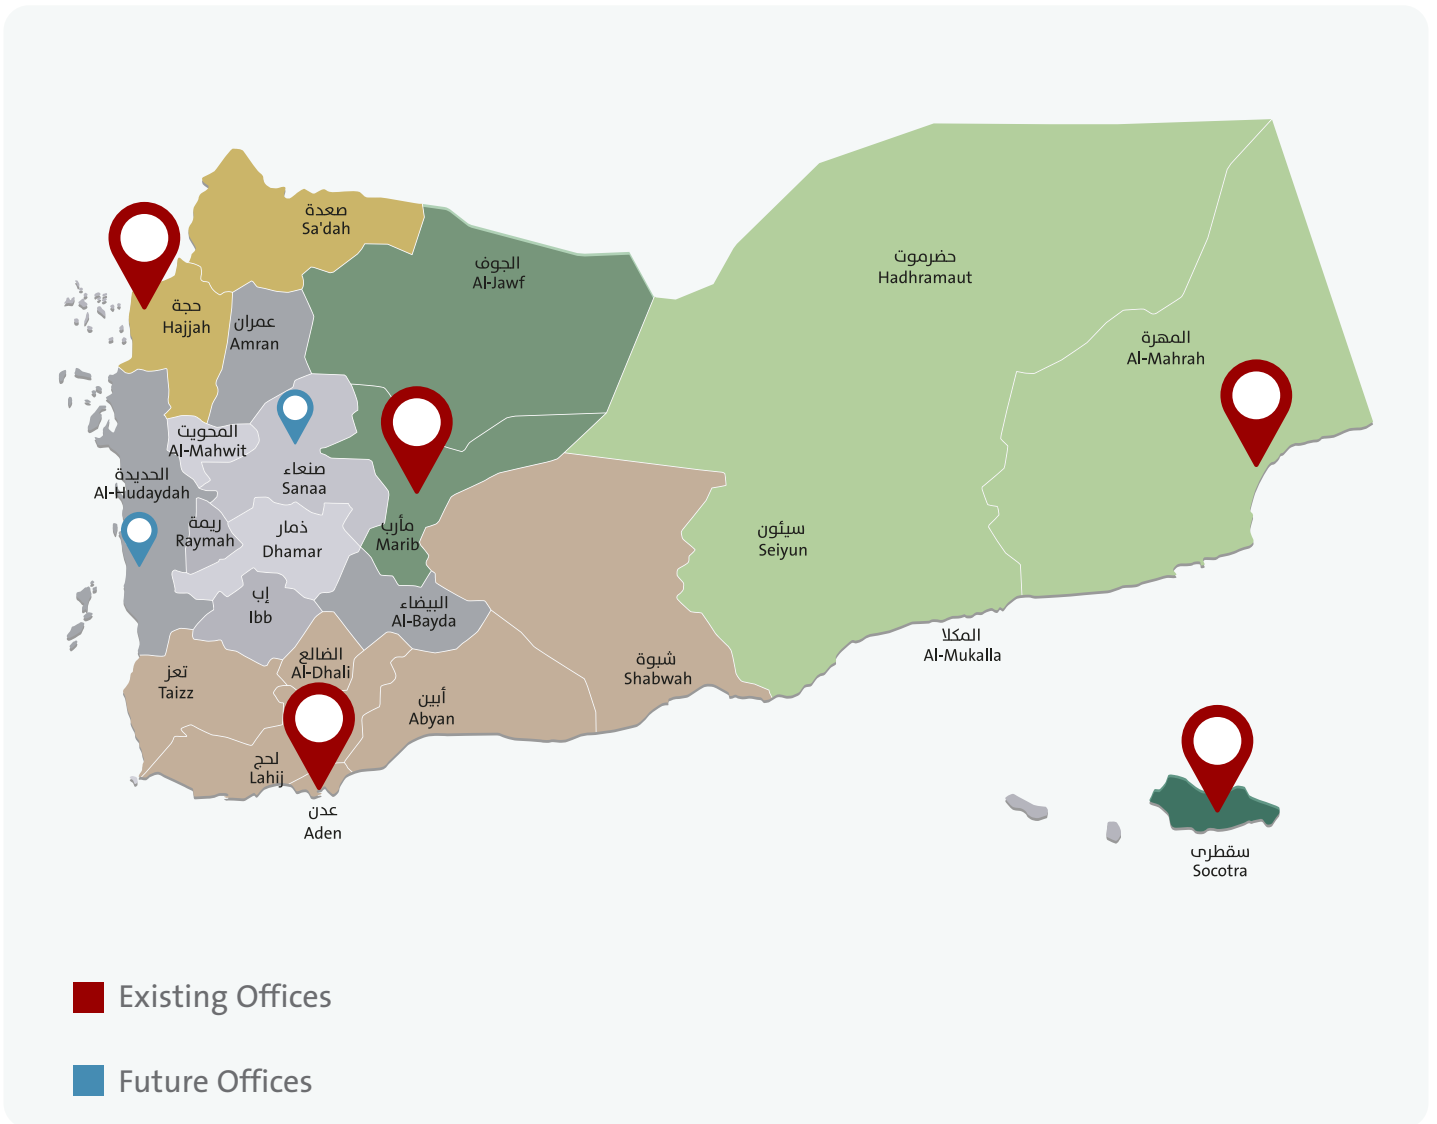

# 03 | SDRPY Work Mechanism

## Our Offices in Yemen

SDRPY opened several offices in Yemeni governorates, staffed by a select group of Saudi and Yemeni engineers and development specialists who assess and verify the needs and oversee the design, implementation and following-up of projects in the field from the early stages, with the aim of ensuring high-quality implementation of them in accordance with international standards. Among SDRPY plans is the establishment of offices in the governorates of Sanaa and Al Hudaydah once a political agreement is reached and the conflict between the Yemeni parties is resolved.

### Coordinating with Local Authorities

### Assessing and Identifying Needs

### Direct Supervision of the Implementation of SDRPY Projects and Initiatives

### Reporting Periodically on the Implementation of Projects

### Building the Yemeni Local Capacities for Management of Projects

## Financing and Direct Implementation

SDRPY finances and implements development projects and initiatives in accordance with the highest international standards, and aligns them with the 2030 Sustainable Development Goals (SDGs).

## Capacity-Building and Institutional Strengthening:

Capacity-building of government ministers

Capacity-building of local authorities and empowerment

Increasing logistics capacity

Capacity-building of the Central Bank

Education capacity- building

Capacity-building in the energy sector

## Health capacity-building

## Capacity-building of the private sector

## Capacity-building of farmers and fishermen

## Capacity-building of craftsmen and micro, small or medium enterprises (MSMEs)

## Capacity-building of youth and women

## Financing Civil Society Institutions:

### Livelihoods Support Project

Aden Governorate and its Environs  
(Lahij – Abyan - Ad Dali)

In partnership with the Small and Micro Enterprises Promotion Services (smeps), the Livelihoods Support for Vulnerable Communities program is being implemented through the training of 1,415 beneficiaries, and providing in-kind governed grants in the food security sector.

### Program for the Economic Empowerment of Yemeni Women Marib Governorate

In cooperation with the Marib Girls Foundation, a program is being implemented that aims to increase the opportunities for Yemeni women to participate socially, economically and culturally in the Yemeni society, as it aims to train 60 women in the fields of marketing, project management and entrepreneurship in Marib Governorate.

## Environmental Sanitation (Beautiful Aden) Aden Governorate

The SDRPY campaign for environmental reform, in cooperation with the Cleanliness Fund in Aden, to remove waste and residues, and environmental sanitation, in cooperation with 300 volunteers, to restore Aden's beauty.

## Craft Lab Socotra Governorate

In cooperation with the Coastal Women's Association, work has begun on a craft lab, which aims to increase the economic participation of Yemeni women in economic recovery, by creating an appropriate environment for women that enhances their economic contribution through training workshops, equipment and craft tools to build their technical and craft capabilities.

# Partnerships

## Constructive and Effective Engagement

Strengthening cooperation in the study/design/implementation/ follow-up of projects and initiatives in accordance with best practices

Alignment with international development standards in implemented projects and programs

Contributing to achieving Sustainable Development Goals (SDGs)

Contributing to unifying international efforts to enhance the capabilities of the Yemeni government and civil society institutions

Rehabilitation of Al Ghaydah Regional Airport

## Institutional Support

Providing Technical and Logistic Support

Building the Capabilities and Establishing Governance of Government Institutions

يونيو 2021 June 2021

Supporting Security and the Efforts of Strengthening Stability and Peace

## Stability Workshops

**SAUDI YOUNG MEN AND WOMEN 140 TRAINING MORE THAN FROM VARIOUS SAUDI ENTITIES**

## Chapter Three

# Development and Reconstruction Achievements

## 03 | The Achievement and the Future

SDRPY is the largest non-UN organization globally, contributing to development in Yemen based cloud "ranked" of donors on the United Nations Financial Tracking Platform (FTS), through a number of projects and initiatives that contribute to advancing development and deepening the leading Saudi role in the context of Yemen's development efforts.

SDRPY continues its effective and influential role, which is recognized by all international parties concerned with the development field, in addition to being a national base (platform) that leads the development process in Yemen in accordance with the highest international standards and through adjusting to the rapid political, economic and social changes in Yemen.

## 04 | Accomplishments and Indications

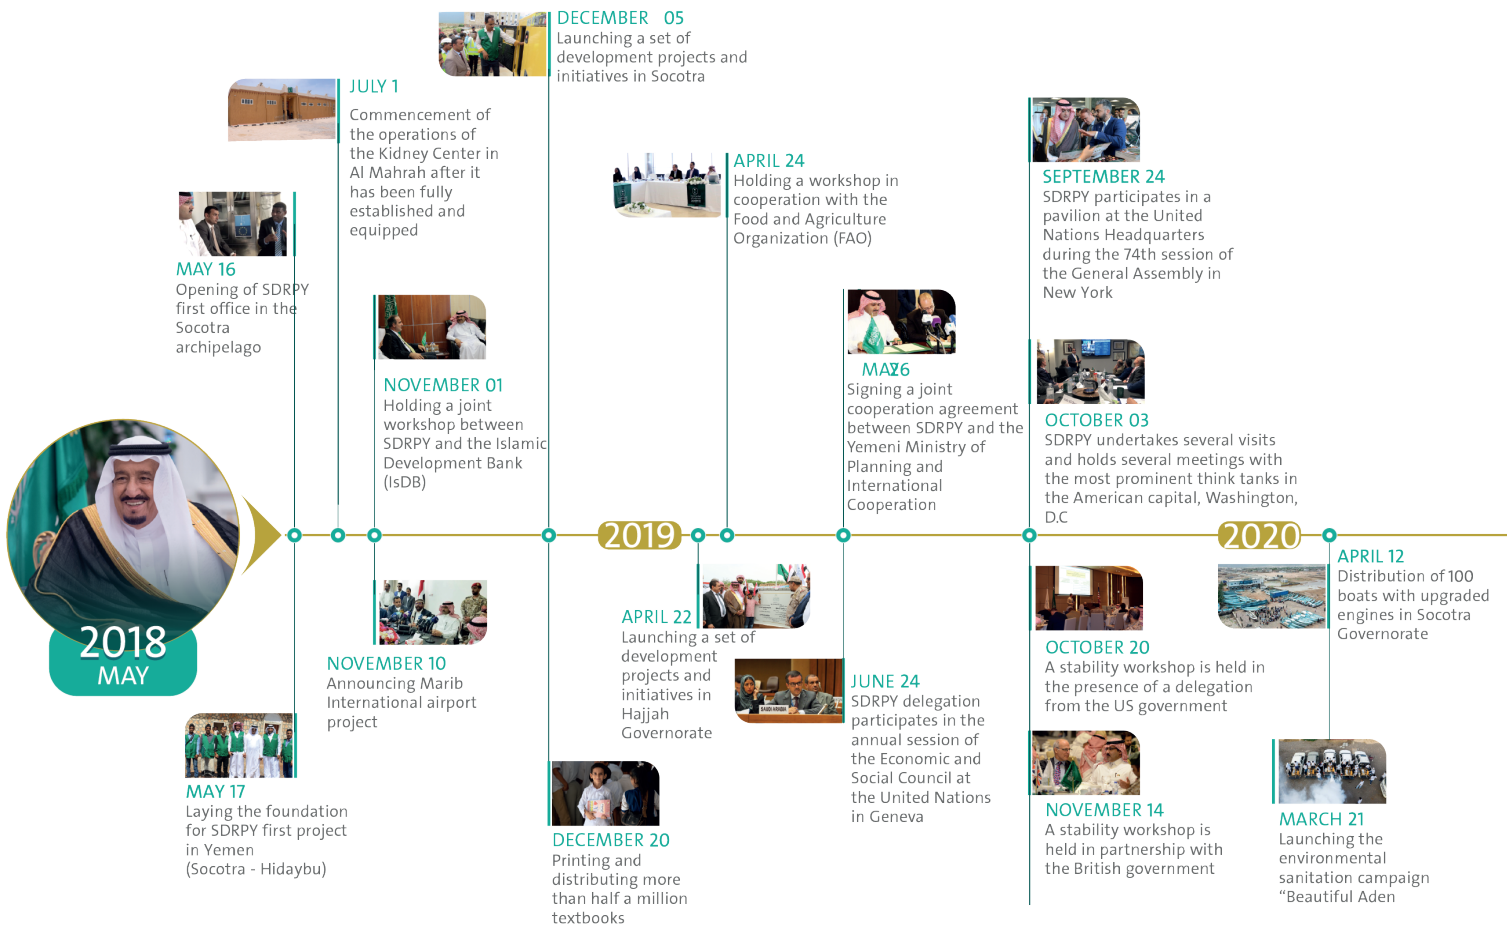

SDRPY has made great achievements since its inception during the period between (2021-2018), during which it addressed many challenges facing development in Yemen, and contributed to making a mark and achieving a clear impact at the local Yemeni and global levels. SDRPY has contributed to making the Kingdom of Saudi Arabia a leader in development in Yemen, and making the Kingdom ranked first internationally in development support for Yemen on the international level.

**“The aim of SDRPY is to give Yemenis a chance at a better life and achieve the strategy of restoring hope and reconstructing a secure and stable Yemen.”**

# 03 | Important Milestones in the Development and Reconstruction of Yemen

**OCTOBER 29**  
Opening 8 model schools in Al Mahrah. SDRPY built and fully equipped each school

**OCTOBER 25**  
Signing an MoC with the Ministry of Environment, Water and Agriculture

**SEPTEMBER 13**  
Launching several developmental projects and initiatives in Aden

**SEPTEMBER 02**  
Signing a memorandum of cooperation with the Export Development Authority

**NOVEMBER 4**  
Launching the "Sabaa Program for the Economic Empowerment of Women," the first business incubator for women in Marib

**NOVEMBER 02**  
Signing an MoC with the Saudi Ministry of Transport

**NOVEMBER 30**  
SDRPY and ESCWA sign an agreement to support development plans in Yemen

**April 13**  
SDRPY Signs Oil Derivatives Grant with the Yemeni Government

**November 28**  
Opening 4 model schools in Socotra

**May 8**  
1st tranche of The the Saudi Oil Derivatives Grant arrives at the port of Aden

**December 20**  
SDRPY and ESCWA issued a joint report on Arab Least Developed Countries (LCDs)

**February 28**  
Launching the Al Ghaydah International Airport rehabilitation project in Al Mahrah

**8th March**  
Together with UNDP, SDRPY launched the "Assessing the impact of war in Yemen: Pathways for recovery" report

**2 October**  
SDRPY participates in the Mahri forum to celebrate Meheri Language Day

**2021**

**JULY 23**  
Water pumping begins in Al-Manasra Field project in Aden

**JUNE 17**  
Signing a memorandum of cooperation with the Saudi Ministry of Sports

**DECEMBER 27**  
Launching SAR 500 million worth of developmental projects

**January 12**  
Signing two agreements with Alwaleed Philanthropies to develop the housing and education sectors

**June 16**  
Launching the capacity-building program for the Yemeni Ministry of Planning and International Cooperation

**2022**

**April 12**  
Signing an MoC with the Saudi Red Crescent Authority

**May 24**  
Launching the Haijat Al-Abed Road rehabilitation project in Taizz

**17 August**  
SDRPY signs the contract for the operation and management of the Aden General Hospital

**28 September**  
SDRPY signs a grant agreement for Saudi oil derivatives with an estimated total value of \$200 million

**And the development continues**

## What are the Sustainable Development Goals (SDGs)?

The Sustainable Development Goals (SDGs) are a universal call to action to end poverty, protect the planet and ensure that all people enjoy peace and prosperity.

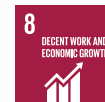

# The Sustainable Development Goals (SDGs) and their relevance to SDRPY sectors:

- Reducing the rate of power outages.
- Raising the operational capacity of vital, governmental and commercial facilities.
- Enhancing security and safety standards and raising the quality of life.
- Strengthening the capabilities of technical personnel in the management of energy resources.

- Contributing to achieving universal access to free education.
- Increasing the rate of enrollment in education.
- Achieving equal educational opportunities for both genders.
- Contributing to improving the school environment.
- Contributing to the development of services provided to students, which leads to an increase in the rate of enrollment in education.

- Contributing to the development of infrastructure.
- Supporting the economic, social and humanitarian activity.

- Providing safe drinking water.
- Achieving water security.
- Contributing to the access of safe and clean water at an affordable cost to the residents of governorates and remote and rural areas.
- Reducing the spread of tuberculosis, malaria and tropical diseases, and combating hepatitis C, waterborne diseases, and other infectious diseases.

- Achieving security and stability for the Yemeni people.
- Strengthening the capabilities of state institutions.
- Reducing the crime rate and the smuggling of contraband and drugs.
- Contributing to creating an attractive environment for investments and investors from abroad.

- Increasing the capacity of health facilities and installations.
- Improving the performance of the health sector and raising the quality of services provided.
- Supporting reproductive, maternal and child health centers to contribute to reducing pregnancy and childbirth mortality rates.

- Contributing to increasing the rate of food security.
- Improving and raising the efficiency of agricultural production.
- Improving and raising the efficiency of fish production.

- Promoting health-related and environment-related quality of life.
- Promoting social responsibility.
- Promoting sustainable and inclusive growth and providing decent work for all.
- Empowerment of human resources for both sexes.
- Improving the efficiency of the use of natural resources.

# Energy Sector

**\$531,879,302** Cost of Projects and Initiatives

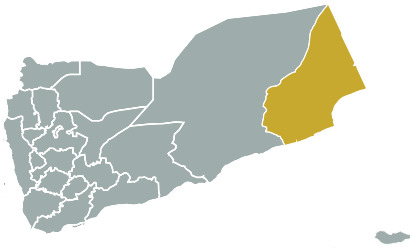

Number of Projects and Initiatives

**29**

Initiatives **3** / Projects **26**

## Al Mahrah Governorate:

### Projects:

- Rehabilitation of Al Ghaydah power plant.
- Increasing the production capacity of electrical energy for Al Ghaydah power plant.
- Providing electrical power to operate the surgery rooms and intensive care units at Al Ghaydah Hospital.
- Providing electrical energy to operate the dialysis center at Al Ghaydah Hospital.
- Rehabilitation of the electricity network of Al-Sada neighborhood and Al-Souq neighborhood in Al Ghaydah District.

### Initiatives:

- Providing oil derivatives (diesel) for the daily operation of power plants

## Socotra Governorate:

### Projects:

- Construction of two electric power plants for Hidaybu and Qulensya.
- Supporting the Socotra power plants in Hidaybu with an electric generator with a silencer, oils, filters and materials to reconnect the plant to the grid.
- Providing electrical power for Socotra International Airport.
- Connecting Hidaybu Maternity and Childhood building to the public electricity grid.
- Temporary fuel tanks system (supply and installation of 5 diesel tanks with a capacity of 500 thousand liters connected to pumps for filling and unloading).
- Construction of 10 fuel tanks with a total volume of 1000 tons (first phase).
- Providing electrical energy to operate the Nujd Health Center.

### Initiatives:

- Providing oil derivatives (diesel) for the daily operation of power plants

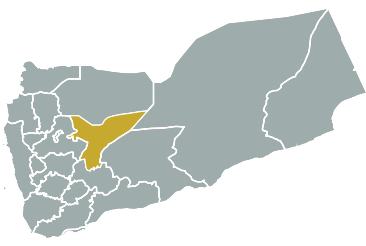

## Aden Governorate:

### Projects:

- Providing Aden streets with lighting by providing 500 double and single lighting poles with solar-powered lighting units
- Providing electrical power for Aden International Airport

## Marib Governorate:

### Projects:

- Providing Marib streets with lighting by providing 100 single poles and 264 double poles powered by solar energy

## Hajjah Governorate:

### Projects:

- Providing Hajjah streets with lighting by providing 50 single poles powered by solar energy.
- Supporting the electricity grid with 5 electric generators and filters for some existing generators.
- Constructing three rooms for generators with all their equipment in the districts of Midi and Hiran.

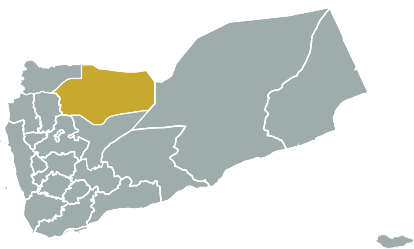

## Sa'dah Governorate:

### Projects:

- Providing Al Boqee land entry-exit point with electrical power.
- Providing Al Boqee land entry-exit point with 176 solar-powered lighting poles.

## Al Jawf Governorate:

### Projects:

- Supporting the power grid with 8 transformers, a distribution panel, and an electric cable.
- Lighting the streets of Al Jawf with 94 solar-powered lighting poles.

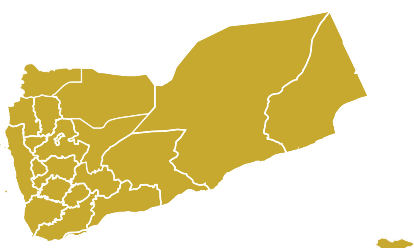

## Mayyun (Perim) Island:

### Projects:

- Providing Mayyun (Perim) Island with electrical power.

## Several governorates:

### Initiatives:

- Providing oil derivatives (diesel and mazut) for the daily operation of 80 power plants.

● Completed ● Underway ● Halted

Some of Our Energy Sector

# We Enhance Energy Efficiency

The oil derivatives grants provided by the Kingdom of Saudi Arabia through vital plants in Yemen. The support 64 Yemeni ports succeeded in operating provided was not limited to these grants, but also included the provision of generators and transformers and the establishment of plants, as a contribution to business integration in order to improve operational capacity, which improved the standard of living in several governorates

## The Saudi Oil Derivatives Grant:

A promising turning point to stimulate economic recovery in Yemen.

## Rehabilitation of Al Abr Road, Marib Governorate:

SDRPY works to rehabilitate Al Abr Road, an international road linking Marib Governorate to Al Abr Triangle. The road is currently in poor condition, causing loss of life, property damage and general damage to vehicles. It does not have shoulders that enable drivers to drive easily or stop for emergency, and does not contain warning or guide signs. The road will be rehabilitated and the efficiency will be raised by repairing the paving layers for the entire lane and re-paving according to the standard specifications in addition to expanding the road to support economic, social and humanitarian movement activities.

**22,999,680**

**Beneficiaries a year**

**129km**

**Length of the road**

### Rehabilitation works

Installing guide and warning traffic signs that comply with international specifications

Enhancing the efficiency of the road

Expanding the road

### Development Impact

Contributing to the improvement of the infrastructure of the transportation sector

Contributing to enhancing economic, social and humanitarian activities through repairing the damages as a result of the poor condition of the road

Contributing to upscaling and enhancing efficiency of the roads and the quality of provided services

Contributing to expanding the scope of public transportation

Creating job opportunities

Contributing to raising the safety rate of roads and reducing accidents

Under  
implementation

## Rehabilitation of the network of vital roads, Aden Governorate:

SDRPY works on projects to rehabilitate vital roads in the governorate, as the roads suffer from partial collapse, poor existing pavement layers, and damaged sidewalks and pedestrian paths, which have led to traffic obstruction and increased traffic jams.

The rehabilitation of two main roads, namely the Caltex-Al-Haswa Road and the Shahinaz Road, has been completed, and work is underway to rehabilitate two other main roads, namely the Abyan Coast Road and the Ninetieth Road.

**863,000**  
Beneficiaries

### Rehabilitation works

Solar-powered partial lighting

Re-pavement using high specifications

Enhancing road efficiency

### Development impact

Contributing to facilitating pedestrian crossing

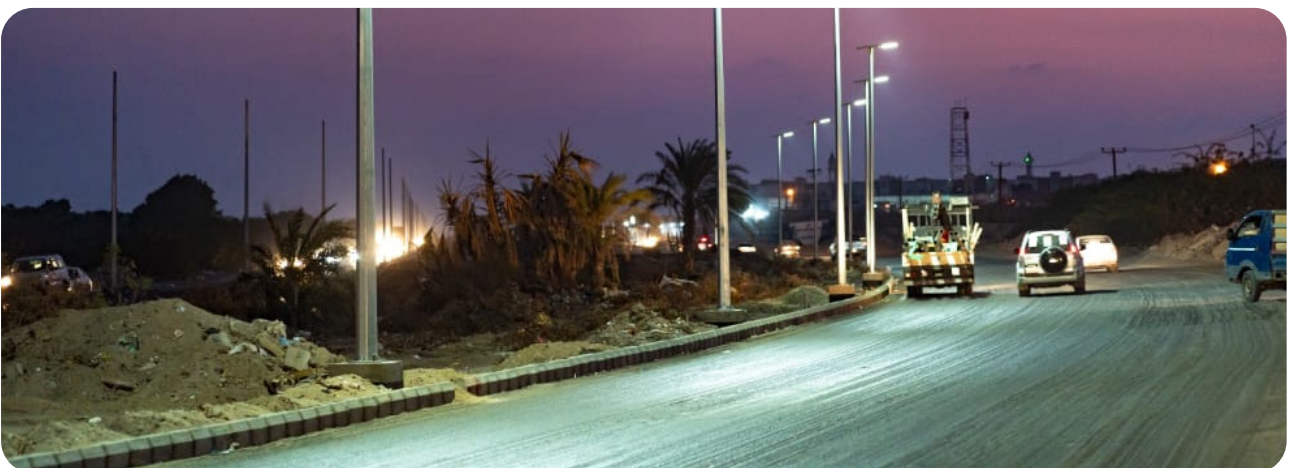

Contributing to enhancing security and reducing accidents

Contributing to smooth movement of traffic

Creating job opportunities

Contributing to enhancing the use of clean energy

Contributing to improving urban landscape

Completed

## Rehabilitation and restoration of Al Ghaydah Regional Airport, Al Mahrah Governorate:

The rehabilitation of Al Ghaydah Airport has been completed and it has been provided with the navigation system (RNAV) and communications systems for the airport tower, to make it compatible with international civil aviation (ICAO) and international requirements, as well as raising the airport's capacity and enhancing the efficiency and quality of services provided to airlines and travelers, which has led to increasing economic, social and humanitarian mobility.

**300,000**  
**Travelers a year**

### Rehabilitation works

Rehabilitation of the control tower

Partial rehabilitation and lighting of the airport runway

Developing buildings, halls and units

Providing ambulances and firefighting vehicles

Implementing aerial inspection and safety procedures and tests

Providing navigation, communication and safety systems

### Development impact

Contributing to expanding the scope of public transportation

Contributing to enhancing the economic, social and humanitarian activities

Contributing to upscaling the efficiency and quality of airports

Contributing to improving the infrastructure of transportation sector

Creating job opportunities

Contributing to improving the services provided for travelers and aviation companies

Completed

## Socotra Port, Socotra Archipelago Governorate:

  
**71,002**  
Beneficiaries

### Rehabilitation works

Forklifts for freight transport

Establishing the port administration building and its facilities

### Development impact

Contributing to increasing freight forwarding

Contributing to enhancing the logistic services of the port

Contributing to enhancing the efficiency and effectiveness of port management

Creating job opportunities

Contributing to enhancing economic and commercial activities

## Promoting Quality of Life and Good Health One Project at a Time!

Our solutions aim for economic, social, and cultural development. Such solutions involve adopting effective procedures to ensure job development and the continued functioning of healthcare facilities to the fullest. For instance, when we established healthcare facilities, we trained the staff on using the SDRPY-supplied advanced medical equipment. With such an approach, we achieve comprehensive development goals that support the medical center, healthcare providers, and patients.

Under implementation

## King Salman Medical and Educational City Project, Al Mahrah Governorate

The city is one of the area's most significant medical and educational projects. It encompasses a state-of-the-art hospital, a variety of housing projects, a mosque, and several colleges, including engineering, medicine, and agriculture. The fully equipped integrated hospital has a capacity of 110 beds, serving families from all over Yemen.

2000 m<sup>2</sup>

A sample of our projects in the  
education sector

## Together, we enhance teaching and learning opportunities!

We create an environment that helps learners secure a better future for themselves and their communities. Our projects include constructing, furnishing, and equipping schools across Yemen, as well as providing school supplies, and textbooks. SDRPY projects and initiatives support teaching and learning opportunities by providing equal educational opportunities for male and female students and ensuring safe means of school transportation. SDRPY's Safe Transport initiative was particularly impactful for young girls residing in remote areas. It encouraged families to send their young girls to school, one of whom attended school for the first time at the age of 12.

## The Education System

SDRPY supports children's education in model schools, engaging them in a stimulating and inclusive environment. Along with classrooms, model schools include chemistry labs, computer labs, and sports fields to support extracurricular activities. The schools provide learners with the tools and opportunities to grow and develop to reach their goals.

- Supplying fishers with 20 fishing boats.
- Supplying fishers with 20 boat engines.

● Completed

A sample of our projects in the agriculture and fisheries sector

## Agriculture

Farmers harvest around 250kg of tomatoes through greenhouse cultivation, which is a 50% increase over the standard methods. By promoting and raising awareness regarding updated and modern agricultural techniques and systems, we enable farmers to benefit from the land.

Through several projects, including farming in greenhouses, supporting wheat cultivation, and distributing agricultural equipment, such as tillers, we are working to strengthen the agricultural sector and empower farmers to achieve self-sufficiency for themselves and their families while attaining sustainable food production.

## The Greenhouses Initiative, Al Mahrah and Hajjah Governorates

### The objectives of the initiative

Training farmers on agricultural operations, such as irrigation, fertilization, pest control, and crop care.

Training farmers on using greenhouses.

Assistance and guidance in addressing technical issues (supporting farmers during the harvest season).

Training farmers on using modern agricultural techniques.

### Greenhouse crops:

Okra

Zucchini

Cucumber

Tomatoes

## Development Impacts

Promoting food security and achieving self-sufficiency.

Supporting one of Yemen's vital economic sources.

Generating new job opportunities.

Building the capabilities of farmers.

Mitigating the impact of pests on the agricultural economy.

- Providing 2 trucks and tankers to transport water to Saadah Governorate.
- Providing 6 trucks and tankers to transport water to Hadhramout Governorate.

A sample of our projects in the  
water sector

## Water is Life

In an area where clean, safe drinking water is scarce, Yemenis depend on salty sea water to meet their everyday needs. However, through recent water management projects, we were able to obtain clean and drinkable water sources. SDRPY projects contribute to the delivery of sufficient water supplies to meet people's needs, despite the land's unique nature. Therefore, water is delivered by methods appropriate for each region; for rugged areas, the water is delivered through tanks. However, if the geographical environment allows well-drilling, then wells are drilled to provide families sustain access to clean water. Because access to clean water is a development priority that is directly relevant to the quality of life, such projects are integral as they meet the needs of residents and reduce the suffering of women and children.

Supporting economic growth and development

Improving the urban landscape of residential neighborhoods

Upgrading the infrastructure

Improving the quality of life

Under implementation

## The Craft Lab, Governorate of Socotra

With the proper tools and support, women can achieve financial security for themselves and their families. In partnership with the Coastal Women Association, the Craft Lab was established to support women and artisans in sewing, embroidery, and other handicraft projects, providing a suitable and rich environment for women to engage in the labor market.

### 684 Beneficiaries

#### Project Objectives

Improving the quality of life

Social integration of vulnerable groups

Building the capacity of Yemeni women to achieve sustainable economic growth

Increasing female labor force participation rates

#### Project Impacts

Empowering women

Reducing unemployment rates

Contributing to sustainable growth

Investing in human capital

## Voices From Yemen:

### Beneficiaries of SDRPY's projects and initiatives share their stories

#### Oil Derivatives

To secure stable livelihoods and achieve a sustainable, resilient economy, the Kingdom of Saudi Arabia presented the Oil Derivatives Grant to various Yemeni governorates.
