The Saudi Development and  
Reconstruction Program for Yemen

Hand in Hand Paving the Way  
Towards a Promising Future

# البرنامج السعودي لتنمية وإعمار اليمن

The Saudi Development and  
Reconstruction Program for Yemen

## Who Are We ?

Through continuous cooperation with the Yemeni government, SDRPY is a Saudi strategic initiative that aims to provide support to Yemen and its people by:

1. Providing economic and development support across all sectors in Yemen.
2. Improving the livelihood and living standards for Yemenis .
3. Enhancing the infrastructure and basic services available to children, families and all Yemenis.
4. Creating job opportunities.
5. Contributing to peacebuilding.

With SDRPY's projects, initiatives, and development programs, we join efforts to achieve the most tangible results that support sustainable development across the various governorates of Yemen. In addition, to achieve prosperity and peace in the area, our projects also target the empowerment of local communities and encourage members to take active roles in the various development projects and initiatives.

**We are putting schoolbooks in the  
hands of children in place of weapons**

**Mohammed Saeed Al Jaber**

General Supervisor of SDRPY  
Saudi Ambassador to Yemen

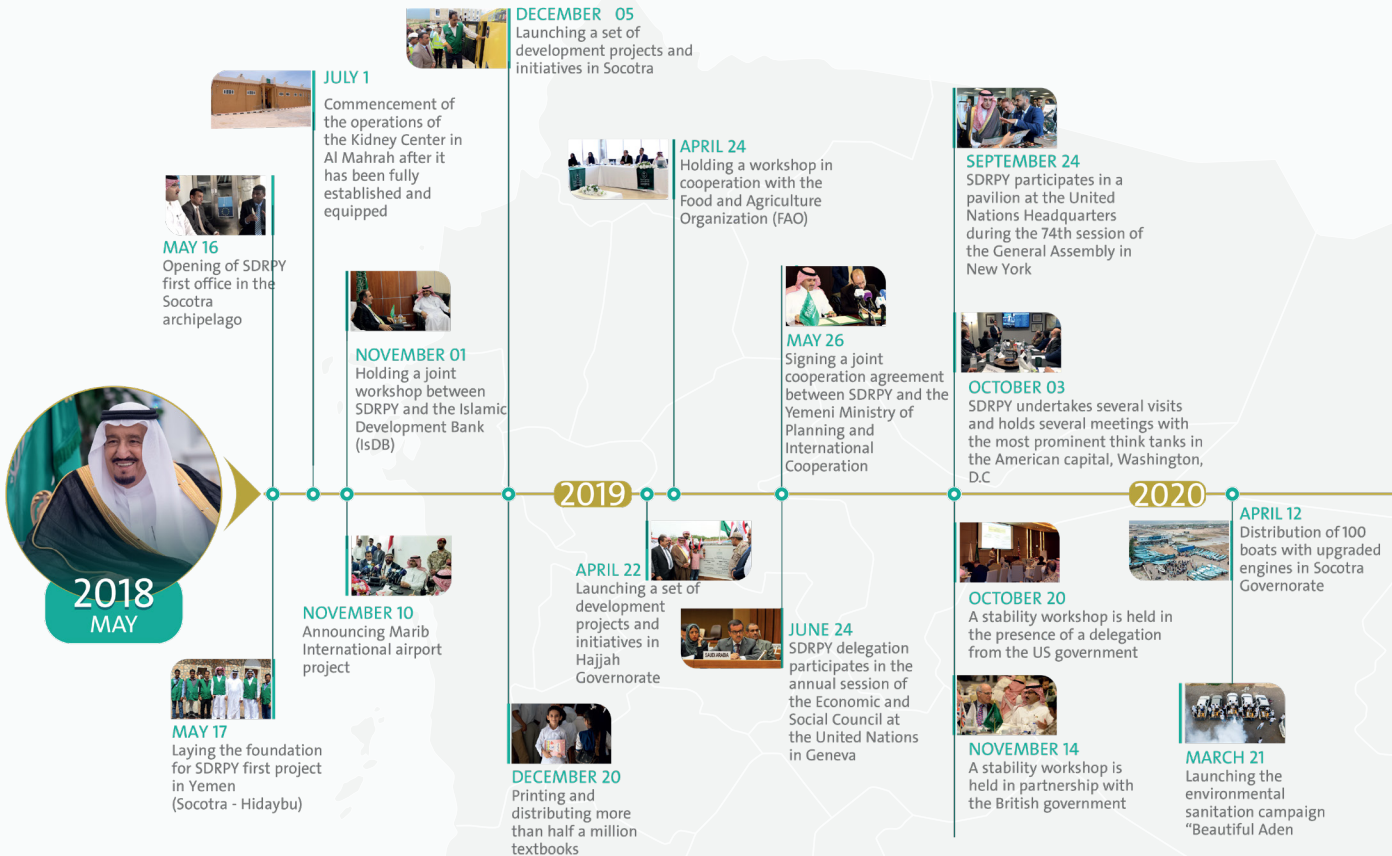

## What is the Scope of our Work ?

We support seven critical sectors in Yemen, including health, education, energy, transportation, water, agriculture and fisheries, as well as strengthening and building the capacities of members working in these sectors.

SDRPY adopts the best practices in development and reconstruction. Through our offices located in various Yemeni governorates, we coordinate with stakeholders to assess the local needs and identify priorities to reach a common ground that is aligned with the area's circumstances. Such collaboration allows us to create sustainable solutions that directly and positively impact the livelihood of individuals and communities.

# SDRPY's Milestones

**OCTOBER 29**  
Opening 8 model schools in Al Mahrah. SDRPY built and fully equipped each school

**OCTOBER 25**  
Signing an MoC with the Ministry of Environment, Water and Agriculture

**SEPTEMBER 13**  
Launching several developmental projects and initiatives in Aden

**SEPTEMBER 02**  
Signing a memorandum of cooperation with the Export Development Authority

**NOVEMBER 4**  
Launching the "Sabaa Program for the Economic Empowerment of Women," the first business incubator for women in Marib

**NOVEMBER 02**  
Signing an MoC with the Saudi Ministry of Transport

**NOVEMBER 30**  
SDRPY and ESCWA sign an agreement to support development plans in Yemen

**May 8**  
1st tranche of The Saudi Oil Derivatives Grant arrives at the port of Aden

**April 13**  
SDRPY Signs Oil Derivatives Grant with the Yemeni Government

**November 28**  
Opening 4 model schools in Socotra

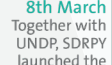

**June 14**  
Inaugurating the Operations and ICU Center Al Mahrah Governorate

**December 20**  
SDRPY and ESCWA issued a joint report on Arab Least Developed Countries (LCDs)

**February 28**  
Launching the Al Ghaydah International Airport rehabilitation project in Al Mahrah

**2 October**  
SDRPY participates in the Mahri forum to celebrate Meheri Language Day

**8th March**  
Together with UNDP, SDRPY launched the "Assessing the impact of war in Yemen: Pathways for recovery" report

**2021**

**JULY 23**  
Water pumping begins in Al-Manasra Field project in Aden

**DECEMBER 27**  
Launching SAR 500 million worth of developmental projects

**JUNE 17**  
Signing a memorandum of cooperation with the Saudi Ministry of Sports

**January 12**  
Signing two agreements with Alwaleed Philanthropies to develop the housing and education sectors

**June 16**  
Launching the capacity-building program for the Yemeni Ministry of Planning and International Cooperation

**April 12**  
Signing an MoC with the Saudi Red Crescent Authority

**May 24**  
Launching the Haijat Al-Abed Road rehabilitation project in Taizz

**17 August**  
SDRPY signs the contract for the operation and management of the Aden General Hospital

**28 September**  
SDRPY signs a grant agreement for Saudi oil derivatives with an estimated total value of \$200 million

**And the development continues**

# Empowering Farmers to Reform the land

“ I now harvest 250 kg of tomatoes through greenhouse cultivation, a %50 increase in production from previous cultivations ”

Together, we work to improve Yemen's agriculture as well as empower farmers across Yemen. With the goal of achieving self-sufficiency and self-sustainability in food production, our projects and initiatives include building greenhouses, supporting wheat cultivation, and distributing heavy and light agricultural equipment, such as tractors and farming nutrients, to farmers in Yemen.

SUSTAINABLE  
DEVELOPMENT  
GOALS

# Fishing for a Living: Enabling Economic Growth for All

Providing development and technical solutions to overcome challenges will increase production efficiency and help sustain income for fishermen. SDRPY projects in this sector generate job opportunities, empower fishing communities, and boost the local economy.

Our projects are inspired by the stories and challenges shared by the local fishermen. From how the cyclones ruined their primary source of income to the joys of receiving SDRPY's motorized fishing boats, our development specialists work with fishermen to enable and empower them and improve their livelihood and standards of living.

SUSTAINABLE  
DEVELOPMENT  
GOALS

# Promoting Well-being and Improving Healthcare Services

Our projects, initiatives, and programs provide economic, social, and development solutions that help improve the quality of healthcare services provided to children, women, men, and Yemenis of all ages and backgrounds.

We believe that access to adequate healthcare is a fundamental human right. Thus, our projects in the health sector aim to improve the efficiencies of hospitals and medical centers, enhance the quality of healthcare services, and increase access to healthcare facilities. Besides equipping hospitals with modern medical equipment, rehabilitating and expanding current medical centers, our programs also target medical cadres' development by providing needed training to strengthen their capabilities.

SUSTAINABLE  
DEVELOPMENT  
GOALS

# Improving Energy Efficiency

The improvement of energy generation and efficiency reflects positive economic and social outcomes. Our projects range from providing oil derivatives to power plants to establishing power stations across Yemen.

The Saudi Oil Derivatives Grant to Yemen has made it possible for 80 power stations to fully and continuously operate, generating, in return, constant and stable energy that is powering homes, hospitals, and schools.

Our initiatives and programs include supplying Yemeni governorates with power generators and establishing new power stations to improve energy generation and distribution.

# Increasing Access to Education and Creating Learning Opportunities

Through our development projects and initiatives, we at SDRPY aspire to create a brighter future for the children and young people in Yemen by increasing access to education and promoting equal access for all.

Almahra received several SDRPY school buses, which helped encourage parents to send their daughters to schools. These buses were a fundamental reason for the enrollment of a 12 year old village girl in school for the first time in her life. Thus, no project is considered small when the impact is monumental to families across Yemen.

SUSTAINABLE  
DEVELOPMENT  
GOALS

# Promoting the Use of Clean Energy

We promote the use of clean resources and renewable energy such as solar energy. We use solar powered well pumps in our water projects and solar powered streetlights. Renewable energy provides solutions that have positive socio-economic and environmental impacts.

SUSTAINABLE  
DEVELOPMENT  
GOALS

# Sustainable Cities, Communities and Social Inclusion

The launch of the environmental sanitation campaign in various Yemeni governorates, contributes in improving livelihood, creating a safe environment, improving urban landscape, combating environmental and health pollution. Our sanitation activities include capacity-building, supplement of machineries and equipment, waste removal, afforestation, streetlights and road sterilization.

SUSTAINABLE  
DEVELOPMENT  
GOALS

# Access to Clean Water

Some Yemenis are forced to drink sea water due to the scarcity of clean water in a number of areas. Lately, we were able to provide sustainable water resources to those in need.

Moreover, the lack of access to sufficient drinking water has led poor families, especially women and children, to spend a lot of time fetching clean water. To meet their needs, we work to deliver adequate water supplies by providing safe drinking water through water trucks, tanks or by drilling artesian wells.

# Safety First

We are keen on securing international safety standards that are consistent with the requirements of the international navigation systems by supplying heavy equipment intended for building roads and helping people in tropical crises, and distributing ambulances, firetrucks, and public transportation buses. We also work on rehabilitating airports, seaports, and landports to enhance security and stability.

SUSTAINABLE  
DEVELOPMENT  
GOALS

9  
الصناعة والابتكار  
والتكنولوجيا  
البنية التحتية  
والتصنيع  
INDUSTRY, INNOVATION  
AND INFRASTRUCTURE

# Investing in the Human Capital

Our projects and initiatives contribute in enhancing infrastructure, improving livelihoods, advancing economic growth, strengthening stability and security, nurturing peace, and helping Yemenis themselves to pave the way to a future of sustainable prosperity.

**SUSTAINABLE  
DEVELOPMENT  
GOALS**

# Development Towards Peace and Prosperity

We promote partnering with stakeholders by collaborating with international, Saudi and Yemeni agencies as well as with leading development organizations to achieve effective and unified developmental efforts in Yemen.

We are also working on capacity building and empowering the Yemeni private sector.

**The Saudi Development and Reconstruction Program for Yemen continues to work on finding the most agile and sustainable solutions.**

# Stories from Yemen

## Abundant Production

Residents of Hajjah governorate suffer from a serious agricultural production problem in which the crops are grown either rotten or poisonous, which affected farmers income negatively. 70% of Yemeni people rely on agriculture as a source of income. To end this dilemma, SDRPY provided air-conditioned greenhouses to those farmers. “Thanks to SDRPY, I start my day by irrigating crops that I successfully planted in the greenhouses that include techniques to protect my crops. Now we eat vegetables, and are able to supply markets and low-income villagers” Ahmed said (a farmer from Hajjah). He expressed his appreciation by saying “such agricultural projects build capacities and increase awareness.” **Thus, Ahmed now spends his days happily irrigating and harvesting his vegetables.**

# Stories from Yemen

## Abdulrahman is recovering well

Abdulrahman, an elementary school student, suffered kidney failure due to medical neglect. His deteriorating health affected his way of living, including his school performance. While he recovered well after treatment, his health deteriorated again in 2018 due to a lack of medical guidance. With toxins accumulating in his body and specialized treatment equipment no longer operating in Aden. Abdulrahman soon went into a coma. Shortly, SDRPY launched a program equipping the dialysis center at Al-Jumhuriyah Hospital in Aden. With the presence of the new equipment, Abdulrahman's health has improved. **We at the SDRPY wish Abdulrahman a speedy recovery and anticipate his return to school very soon.**

# Stories from Yemen

## Small Projects with Large Impacts

To live 12 years without attending school is abnormal, but it was a situation a Yemeni girl found herself in. She was raised in a remote village where the nearest school is 10 km away. Due to the distance and unsafe roads when going to school, her parents decided not to let her go to school for her own safety. Finally, a school bus provided by SDRPY passed by her village, that is when her parents got excited to see a safe transportation that **will give their daughter a chance to attend school for the first time in 12 years, which resulted in encouraging the residents to let their children attend school and have equal access to education.**
